

Rezaul Karim Rifat

Full-Stack Web Developer

Dhaka, Bangladesh | rezaul2002104@gmail.com | +880 1722292603

GitHub | LinkedIn | Portfolio

Professional Summary

Full-Stack Web Developer with hands-on experience building web applications using Python, Django, React, Next.js, TypeScript, JavaScript, HTML, CSS, and Tailwind CSS. Focused on developing responsive user interfaces, REST APIs, and practical full-stack applications through project-based development.

Technical Skills

Languages: Python, JavaScript, TypeScript, HTML, CSS

Frontend: React, Next.js, Tailwind CSS, Bootstrap

Backend: Django, Django REST Framework

Tools: Git, GitHub, REST API

Projects

Django Blog App

Live Demo | GitHub

- Built a Django-based blog application where users can create, read, edit, like, dislike, and comment on blog posts.
- Implemented full CRUD functionality for posts and user interactions using Django and Bootstrap.

Book Vibe

Live Demo | GitHub

- Built a responsive book management application using Next.js, TypeScript, and Tailwind CSS.
- Enabled users to explore books, view details, manage Read and Wish Lists, sort saved books, and visualize reading progress.

DevStack

Live Demo | GitHub

- Built a developer-focused web application using React, TypeScript, and Tailwind CSS for exploring development resources and technologies.
- Implemented reusable React components and TypeScript-based data structures.
- Developed a responsive interface for an improved user experience across devices.

Country Explorer

Live Demo | GitHub

- Built a country exploration application using React and TypeScript to display country information from an external REST API.
- Implemented dynamic country data rendering and visited-country tracking.
- Used reusable React components and responsive Tailwind CSS styling.

BPL Dream Eleven

Live Demo | GitHub

- Built a cricket team management application using React, TypeScript, and Tailwind CSS.
- Implemented player exploration and dream-team selection functionality.
- Developed reusable components and managed application state using React.

Grocery Store

Live Demo | GitHub

- Built a grocery product search application using React, TypeScript, and Tailwind CSS.
- Implemented product-name search and stock-availability filtering.
- Developed reusable components for navigation, search, product categories, and product rows.

Nature's Platter

Live Demo | GitHub

- Built a responsive food website using HTML and Tailwind CSS to showcase fresh and healthy food items.
- Designed a clean and user-friendly interface optimized for all screen sizes.

Education

Jahangirnagar University

YEAR – 2025

B.Sc. in Statistics and Data Science

Additional

- Actively developing full-stack web development skills through practical projects.
- Experienced with component-based development and REST API integration.
